

Easing Transportation Frustrations

A useful guide to how Keynote Arts can assist you in navigating this often confusing part of planning your trip.

1. Why should Keynote handle my transportation?

Transportation companies are plentiful. Keynote Arts Associates takes the time to research reputable and accredited transportation companies in your area and will explore several quotes in order to provide you with the most economical, but safest travel experience. We are aware that your school or organization may have a list of approved transportation vendors and are happy to work them on your behalf.

2. What about the details?

Any transportation quote you receive from Keynote Arts will be complete and inclusive; we will always remember to include taxes, hidden surcharges, driver hotel accommodations, and gratuities. Keynote also considers Department of Transportation driver guidelines and limitations to make your trip safe and worry-free! For example, did you know that a driver is only allowed 11 hours of consecutive driving time and a total of 15 driving hours in one day?

3. What do I need to provide?

In order to allow Keynote to work efficiently on your behalf, please be prepared to provide as many details as possible. Include travel dates, approximate departure times and the total number of travelers. Remember — a motor coach is a fixed cost. It remains the same even as your number of travelers fluctuates. It is important to estimate the total number of travelers as accurately as possible. Please understand that variations in your group attendance can increase your per-person transportation cost.

We look forward to helping you plan your trip. Don't hesitate to contact your Keynote representative for more information on this very important part of your event experience. Just call us at 800.522.2213!
